

# Specialist Registrars - Introduction to Health Informatics Evaluation

For Office use only

## Important notice:

The aim of the course was to provide a 'feel' for Informatics. This was achieved by presenting a wide range of topics along with additional indepth written material for further study if so desired by individuals on the course

		,		,

### Section D: Robins talks

For Office use only

Robin gave several informal talks during the course including social issues, databases, object orientated modelling, how to design systems, how to forge links with the IM&T department and coding / classification systems. The questions below refer to these.

### Section G: Needs assessment

For Office use only

Most of you came for a short informal chat before the course began to discover more about it and explain what you wished to get out of the course. Some of you also expressed a wish to delay the assignment until the end of the study days. Most of you have also had a further chat with myself discussing how you could take certain areas of informatics further after the course.
